

Research Recommendation (for Scientific Community):

Sr. No.	Recommendation Title / Text	Year
1	To study the effect of salinity on germination and seedling growth of rice varieties Four rice varieties, namely, Jaya, Gurjari, IET-15429 and IET-13428 exhibited significantly higher salt tolerance during germination and seedling growth stages against both levels of salinity concentrations (20 & 24 mmhos/cm). Thus, these four genotypes are comparatively more salt tolerant.	2008
