PRJT 421   **PROJECT CUM INTERNSHIP**   **20(0+20)**

The objective of the project work is to solve industrial (or society or research) problems by developing quality software solution. During the development of the project the students should involve in all the stages of the software development life cycle like requirements engineering, systems analysis, systems design, software development, testing strategies and documentation with an overall emphasis on the development of reliable software systems. The primary emphasis of the project work is to understand and gain the knowledge of how to plan, schedule, and monitor the software project. Topics selected should be complex and large enough to justify as a software project. The courses studied by the students during the B. Tech. (AIT) programme provide them the comprehensive background to work on diverse application domains.
