

One Day Visit Organized by
Industry Institute Interaction Cell -IIC
CAET, AAU, Godhra

Event Organized

The 18th Heads of State and Government Summit of the Group of 20 (G20), under the Indian Presidency, is scheduled to take place in New Delhi, India, during September 2023. The summit will revolve around the theme of 'One Earth, One Family, One Future'. As part of the G20 proceedings, the National Innovation Foundation (NIF), India, and the Indian National Science Academy (INSA), in association with the Science 20 (S20) engagement group, have arranged a panel discussion titled "Disruptive science for Innovative and Sustainable development". The discussion will be held at the Ahmedabad Management Association (AMA) located on Dr. Vikram Sarabhai Marg, University Area, Ahmedabad, on the 26th of June 2023.

To enrich the panel discussion as the audience, students from CAET, AAU, Godhra, have been invited to participate. Under the guidance of Er. Chirag Jadav, Chairman of the Industry Institute Interaction Cell and Assistant Professor in Mechanical Engineering in the Basic Engineering & Applied Sciences Department, a visit has been organized for the students on the 26th of June 2023 during 12:15pm to 1:00pm.

About Event

The event focused on the theme of "Disruptive Science for Innovative and Sustainable Development," with two sub-themes: 1. Universal Holistic Health and 2. Clean Energy for a Greener Future. The program commenced with a series of expert lectures, followed by a panel discussion led by the distinguished experts and organizers. The panel actively encouraged students from various universities in attendance to share their doubts, queries, and questions.

Three experts were present to address the different topics. Dr. S. Sundar Manoharan, Director General of Pandit Deendayal Energy University, spoke on the topic of Clean Energy for a Greener Future. Dr. Chaitanya Joshi, Director of the Gujarat Biotechnology Research Centre (GBRC), DST, GoG, shared insights on Universal Holistic Health. Lastly, Prof. Ashutosh Sharma, President of the Indian National Science Academy (INSA), discussed Disruptive Science for Innovative and Sustainable Development. These experts took the students' queries, doubts, and questions seriously, providing well-explained answers and explanations.

Key Role of Officer, Faculty and Staff

The visit was impeccably organized and flawlessly executed, thanks to the dedicated efforts of Er. Chirag Jadav, Chairman of the Industry Institute Interaction Cell, and Assistant Professor. Dr. Mukesh Tiwari, Head of the Soil and Water Conservation Department, and Er. Suryaprakash Suryavansi, SRA of the IDE Department, also contributed their unwavering commitment to ensuring the smooth functioning of all activities throughout the day. A special mention goes to Er. Kapil Mandloi, the Head of the BEAS Department, whose steadfast support was invaluable. The success and productivity of the event were further enhanced by Dr. R. Subbaiah, the Principal and Dean of CAET, AAU, Godhra. His exceptional leadership and visionary approach played a crucial role in shaping the event and ensuring positive outcomes. Overall, the collaborative efforts of all individuals involved contributed to the resounding success of the event.
