

ESSAY WRITING COMPETITION ON

# ROLE OF ENERGY IN THE INDIAN ECONOMY

Under theme  
"CLEAN ENERGY FOR ALL"

The Essay Writing Competition on the theme "Role of Energy for Indian Economy" was organized by the Department of Renewable Energy Engineering, College of Agricultural Engineering and Technology on 26<sup>th</sup> July 2023. The event aimed to encourage students to explore and articulate their insights on the crucial relationship between energy and India's economic growth. It also aligned with the G20 theme "Clean Energy for All," emphasizing the significance of clean and sustainable energy solutions for national development.

The competition witnessed the participation of 8 UG and PG students from the College of Agricultural Engineering and Technology. Each participant was given the opportunity to express their thoughts and ideas on the role of energy in shaping India's economy through a well-structured essay.

Dr. D.K. Vyas, the Convener of the event, delivered encouraging welcome remarks, and Er.J.Sravankumar, co-convener emphasized the relevance of the chosen

theme in the context of the G20 initiative for clean energy accessibility.

The Essay Writing Competition, centered on the theme "Role of Energy in the Indian Economy," proved to be a thought-provoking and insightful event. The participants' essays showcased a deep understanding of the importance of energy in shaping India's economic trajectory and emphasized the crucial role of clean and sustainable energy solutions in achieving national development goals. The Department of Renewable Energy Engineering is proud of the student's enthusiasm and looks forward to more such initiatives to promote knowledge exchange and awareness of clean energy for a greener and prosperous India.

The organizing committee encouraged all participants for their active involvement and thoughtful contributions in the form of essays and also to take part in other events. The event was successfully organized with the encouragement and support of Dr.R.Subbaiah, Principal and Dean, of the College of Agricultural Engineering and Technology, and the G20 theme "Clean Energy for All."
