

POSTER PRESENTATIONS ON
WASTE TO WEALTH

Under theme
"CLEAN ENERGY FOR ALL"

The Poster Presentation Competition on the theme "Clean Energy for All" was organized by the committee "Clean Energy for All" under G20, Department of Renewable Energy Engineering, College of Agricultural Engineering and Technology. The event aimed to promote and encourage innovative ideas and research in the field of clean energy and its significance in achieving sustainable development and accessibility for all.

The competition brought together 5 enthusiastic students from the College of Agricultural Engineering and Technology, Godhra. Each participant was given the opportunity to create and present a visually appealing poster showcasing their research and ideas related to various clean energy sources, and more specifically related to the Waste to Wealth concept. The event provided a platform for the students to demonstrate their knowledge, creativity, and commitment to contributing to a greener and more sustainable future.

Dr. D.K. Vyas, the Convener of the event, delivered a welcome address, highlighting the importance of clean energy and its role

in addressing global energy challenges under the G20 theme.

Each student participant presented their ideas through their well-designed posters. The presentations were open to the audience.

The Poster Presentation Competition, organized under the G20 theme "Clean Energy for All," proved to be an impactful event. The creative ideas and dedication of the participants showcased the potential of clean energy adaptations in contributing to a more sustainable and inclusive future. The Department of Renewable Energy Engineering is proud of the student's enthusiasm and looks forward to more such initiatives to foster innovation and awareness in clean energy for a better world.

Er.J.Sravankumar, the co-convener extended special thanks to the participants for their active involvement and valuable contributions to the poster presentations. The event would not have been possible without the support and encouragement of the College of Agricultural Engineering and Technology and the G20 theme "Clean Energy for All."
