

**Training programme on “Food Processing Technology” jointly organized
by College of FPTBE, AAU, Anand and ATMA Project, Devbhoomi
Dwarka for women farmers of Devbhoomi Dwarka district**

College of Food Processing Technology and Bio Energy, Anand Agricultural University, Anand and ATMA Project, Devbhoomi Dwarka have jointly organized a three days training programme on "Food Processing Technology" from 5-09-2019 to 7-09-2019. In this training programme, 50 women farmers from Devbhoomi Dwarka district have been participated.

In the beginning, Dr.S.S.Kapdi, Professor & Training Incharge has welcomed all women trainees & gave guidance about importance of food processing sector. After that, the subject experts delivered power point presentations/lectures on various topics such as importance of post harvest technology, aonla processing & its products, value addition in vegetables by cold chain management, importance of automation in food industries, quality management & licensing in food processing. Various demonstrations like preparation of paneer from milk, canning and snacks lines working under Incubation Centre, household use of solar cooker, preparation of syrup from fruit, food processing machineries and hands on experience for bakery product like cookies, etc. have been also demonstrated. On last day, trainees have been visited food industry & AMUL chocolate plant.

This entire training programme was successfully organized by Dr.S.S.Kapdi (Training Incharge) and Er.J.P.Rathod under the guidance of Dr.R.F.Sutar, Principal & Dean, College of FPTBE, AAU, Anand.

**Lectures/demonstrations taken by experts to the women farmers of
Devbhoomi Dwarka district**
