

Training Programme on “Application of Remote Sensing and Geographic Information Systems (GIS) in Agricultural Development” organized at EEI, Anand from 30/07/2018 to

A training Programme on “**Application of Remote Sensing and Geographic Information System (GIS) in Agricultural Development**” was organized at Extension Education Institute, Anand from **30/07/2018 to 03/08/2018**. The Extension Education Institute is a regional training institute run by the Govt. of India which imparts different types of training for extension functionaries of development department/ NGOs SAUs of western Zone States.

Total **30** Extension functionaries from Rajasthan, Chhattisgarh, Maharashtra, Goa and Gujarat participated in this training. The major theme of the training was to update the participants about how agriculture can be developed through application of Remote Sensing and Geographical Information System. For this, a balance approach of theory as well practical was adopted covering the content such as use of RS in agriculture, GIS and Digitization using QGIS, hands on experience on QGIS, hand on experience of GPS, RS software etc. The whole training programme was coordinated by **Dr. A C Patel, Extension Educationist, EEI, Anand** under the guidance of The Director, EEI, Anand. Dr. Dhaval Katheria, DIT, AAU, Anand provided the Computer Lab. Facility and extended his cooperation for successful organization of the training programme. Different experts from Anand Agricultural University, Anand delivered the talk and conducted the session.
