M. Tech (Food Technology)

Dean's Message

The Indian food industry is poised for huge growth, increasing its contribution to world foodtrade every year. In India, the food sector has emerged as a high-growth and high-profit sector due to its immense potential for value addition, particularly within the food processing industry.

Changing Indian & global scenario regarding ethnic trend, quality, safety and hygiene of products is widening the scope of food technocrats. Under the guidance of multidisciplinary team of highly experienced faculty members of college, final year students of the current batch are trained not only for knowledge and skills, but also oriented to be a competent professional food technocrat. Beside regular theoretical classes and special lectures on latest development in the food processing sector around the world, students also got exposure through highly sophisticated laboratory and pilot plant facilities, including Experiential Learning Unit.

We welcome industries for interviewing and recruiting our final year students in their respective esteemed organizations. I am confident that our graduates and post graduates will maintain high standards of professionalism and meet the expectation of employer wherever they will be placed. I heartily wish them a bright and prosperous career ahead.

College at a glance

Aptly recognised as the 'sunrise industry', providing vital linkages between the two pillars of our economy – manufacturing and agriculture – the Food Processing industry in India is undergoing a significant transformation. Though low levels of processing and market share in the global arena suggest an untapped opportunity to capitalise on India's enormous raw material base and propel exports, they also indicate few critical challenges to be trounced to sustain continual growth of the industry. The manufacturing of food products of consistent quality and nutritional value at affordable cost is essential to the success of the food industry. The efficient use of resources is the growing concern for all involved in food production, processing, distribution and retailing. The food industry in the country is poised for modernization, which necessitates special attention towards availability of qualified technical manpower. Considering the huge demand of the specialized human resource for the fast growing sectors of food industry, the Anand Agricultural University has established a full-fledged College of Food Processing Technology & Bio-Energy.

College offers B. Tech, M. Tech & Ph. D. programmes in the discipline of Food Technology. Academic campus of the College of Food Processing Technology & Bio Energy is established on a total land area of 4.19 hectares, with seven modern classrooms with audio visual facilities, thirty well equipped laboratories, ten experiential learning units, a special state-of-art NABL accredited Food Quality Testing Laboratory and a unique Incubation-cum-Center of Excellence in food processing.

Vision

Providing excellent food processing professionals to the industry.

Mission

The primary mission of the college is to produce highly skilled, competent and motivated technical manpower for food processing and allied industries. The technocrats so produced will also be competent to handle all the aspects of Government Departments, research institutes, quality testing laboratories and other related agencies. Also, the college is concerned with the exploitation of novel techniques and technologies to maximize the use of food resources.

Goal

The goal of the college is to promote the integration of teaching, research and extension in the area of food processing and bio energy by serving as a premier educational and research institute in the State of Gujarat and in India.
