

**Dr. V. P Chovatiya, Vice Chancellor, Junagadh Agricultural University paid visit to the Main Vegetable Research Station, AAU, Anand**

Main Vegetable Research Station (MVRS) is working on a number of research projects with a variety of vegetable crops, such as brinjal, tomato, chilli, okra, leguminous vegetables and different green leafy vegetables to address the needs of vegetable crops in Middle Gujarat. Honorable Vice Chancellors Dr. V. P. Chovatiya, Junagadh Agricultural University, Junagadh and Honorable Vice Chancellors Dr. K. B. Kathiria, Anand Agricultural University, Anand paid a visit to the MVRS, AAU, Anand on November 25, 2024. Associate Research Scientist (Ento.) Dr. C. K. Borad greeted the delegation cordially with a flower. He gave an in-depth explanation of the station's activities. The Farm Manager and Assistant Research Scientist, Dr. N. A. Patel gave a detailed demonstration of the production and supply of seeds of released varieties to the end users. Dr. M. M. Pandya, Assistant Research Scientists, MVRS and Mr. K. J. Vekariya, Senior Research Assistant provided further details on the high-tech nursery and continuing research initiatives that showcase state-of-the-art techniques in seed production technologies and vegetable crop development. Hon. Dr. Chovatiya sir expressed gratitude to the scientists who have been working under direction of Hon. Dr. K. B. Kathiria sir and wished them well in their future vegetable crop research as well as scientific efforts to provide farmers with higher-quality seeds. Dr. Parthsinh Rahevar took the lead in organizing and facilitating the visit, ensuring everything went smoothly and successfully. At the end of the visit Dr. Vipul Kapadiya express gratitude by delivering a heartfelt vote of thanks.
