No.AAU/DR/RES/T-1/ 8645-47/2012   **Date:** 3 -12-2012

To,

All the Unit/Sub-Unit heads of the AAU, Anand

Sub : Registration of plant germplasm…
Ref : This office order no. AAU/DR/RES/T-4/7086-90/2012 dated 08.10.2012

It has reference to above cited subject and office order. As per the guidelines of Indian Council of Agricultural Research (ICAR), New Delhi, the registration of plant germplasm is to be done at National Bureau of Plant Genetic Recourses (NBPGR). In this connection our university has constituted Institute Germplasm Identification Committee to facilitate germplasm registration. Dr. H. L. Dhaduk (M. 09879521018, e-mail: hareshkumar01@rediffmail.com), Associate Professor, Department of Agricultural Botany, B. A. College of Agriculture is the member Secretary of this committee. As a part of above activity you are informed to send the list of plant germplasm lines maintained at your centre with detailed informations like name of germplasm line / code No., pedigree/ parentage/ place of collection, year of developed / collected, economical/ specific traits possess etc. Moreover, you are also requested to generate the passport data as per the NBPGR guidelines prescribed for your crop and plan to deposit it in NBPGR within two years to get the IC Number. If any important trait specific lines are available then register it in NBPGR. For this, all the informations are available on NBPGR Website (http://www.nbpgr.ernet.in), eventhough if any information required then contact to this office. This task is mandatory and compulsory hence plan according and give the weightage to this important activity.

**Director of Research &
Dean P.G. Studies**
