

## **Environment awareness programme and rally of students organized at Agricultural Research Station, Sansoli**

Environment awareness programme and rally was organized on 20<sup>th</sup> September, 2024 at Pramukh Swami high school, Nenpur, Ta. Mahemdabad, Dist Kheda by Agricultural Research Station, Sansoli. Global environmental awareness offers ways to protect the world's natural resources and reduce the destruction of the environment and improves the natural environment including trees, soil, water and air along with human and wildlife and to have compassion for living creatures.

There are many environmental benefits of planting trees it will bring life to area, improve quality of life, reduce soil erosion and reducing noise, reduces toxic gases, protecting us from harmful ultraviolet rays, lowering frost in agricultural areas, improving our health and reducing stress. Whether is adding another seedling to a forest or adding one in your garden, planting a tree is always a good idea. There is more room for sustainable companies that aim at creating products that cause less damage to the environment.

The Chairman of Pramukh swami high school trust, Shri Ranchhodbhai has flag off the rally of 539 students in Nenpur village. The Principal, Teachers and students of Pramukh Swami high school, Nenpur were participated in the programme with zeal.

The Associate Research Scientist and Head, Dr. D. B. Prajapati, A.R.S., A.A.U., Sansoli had focused the importance of trees/forests for sustainable environment with reference to climate change or global warning and suggests natural farming, tree planting to save earth and save environment.

Dr. B. N. Thakker, Assistant Extension Educationist, delivered lecture on importance steps/cares to maintain environment. Dr. M. B. Zala, Assistant Research Scientist, delivered lecture on climate change on insect pest and importance of honeybees in Agriculture. Dr.Tarak Patel, Associate Research also helps to conduct this programme.
