

**Three days training programme on “Food Processing Technology”
organized by College of FPTBE, AAU, Anand for farmers of Kheda
district**

College of Food Processing Technology and Bio Energy, Anand Agricultural University, Anand has organized a three days training programme on "Food Processing Technology" from 22-07-2019 to 24-07-2019. In this training programme, 47 farmers from Kheda district have been participated.

In the beginning, Dr.S.S.Kapdi, Professor & Training Incharge has welcomed all trainees & gave guidance about importance of food processing technology. After that, the subject experts nicely delivered power point presentations/lectures on various topics such as rice milling, quality management and licensing in food processing, selection and maintenance of food processing machineries, importance of packaging in food processing, various aspects of establishing industry in food processing sector, value addition by drying in food processing. Various canning and snacks lines working under Incubation Centre, preparation of tomato ketchup and sauce, household use of solar cooker, preparation of squash and syrup from fruits and hands on experience for bakery product in bakery school have been also demonstrated during training programme. On last day, trainees have been visited food industry as well as AMUL chocolate plant.

This training programme was successfully organized by Dr.S.S.Kapdi (Training Incharge) and Er.J.P.Rathod under the guidance of Dr.R.F.Sutar, Principal & Dean of FPTBE college, AAU, Anand.

**Lectures/demonstrations taken by experts
to the farmers of Kheda district during training programme**
